2024 COSTS OF REPAIR INCREASE

Record inflation in the economy over the past couple of years has hit auto repair costs particularly hard. Substantial and rapid increases in parts and labor, caused by inventory shortages and demand for qualified technicians have increased the average cost of auto repair.

WE HAVE SEEN AN AVERAGE INCREASE OF 39%* IN THE COST OF REPAIRS OVER THE LAST TWO YEARS.

Consumers are feeling the squeeze as the cost to maintain their vehicle hits new heights. Purchasing a vehicle service contract (VSC) could help protect consumers against these rising costs down the road.
